CONSERVATION

Water Program

Adequate water for the environment in Texas

- § Influence policy and management decisions
- § Decrease urban dependency on source waters and advance utility business model reform
- § Protect source waters and ensure adequate instream flows & freshwater inflows to bays & estuaries
- § Achieve water and energy savings

Water Program

Adequate water for the environment in Texas

Land Conservation Program

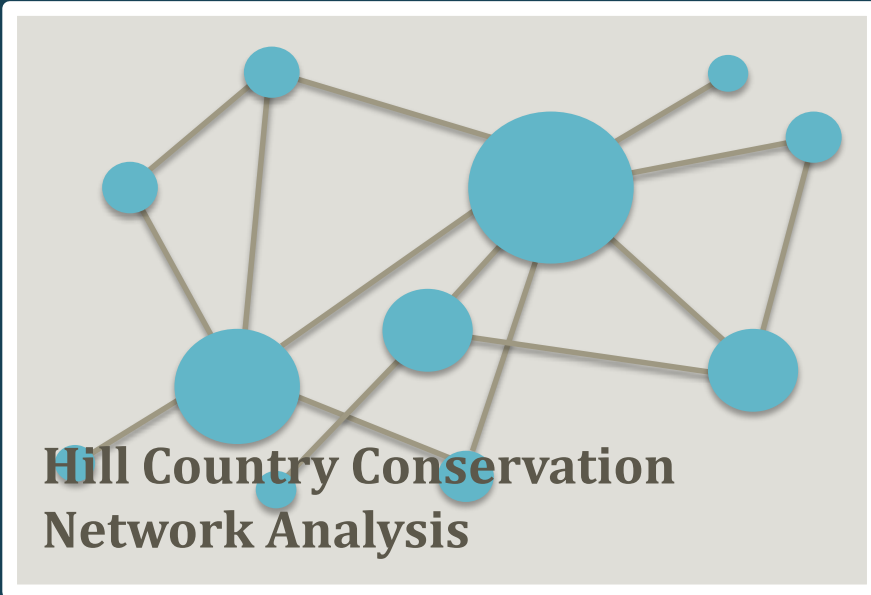

Permanent conservation of priority lands and systemic science-driven stewardship of private lands to ensure healthy waters and abundant habitat

- § Create a strong network of conservation organizations
- § Increase conservation funding in Texas, incl permanent state resources
- § Permanently protect and expand stewardship of priority lands from the Texas Hill Country to the Gulf Coast
- § Minimize adverse impacts on wildlife and habitat from infrastructure-related development

Land Conservation Program

Permanent conservation of priority lands and systemic science-driven stewardship of private lands to ensure healthy waters and abundant habitat
